WE HAVE KITS!

Instead of rummaging through chests and finding out your team's run out of TNT- how about we make you spawn with it? Yeah- that's the power of kits.

We also have kits that play to your strengths!
Marksman, Barbarian, Miner, Skybridger- just to name a few.

Of course, individual maps add extra blocks that you might need- but having these kits will certainly make your life easier, no?

INSTANT IRON ARMOUR? YES!

Craft the set instantly with the iron workbench! No need to spend time crafting sets- just get the iron & you're ready.

FRESH MAPS

While classic maps are great- they have their issues. We've got both classic & revamped maps with significant gameplay improvements so that no matter what map- your fun gaming experience comes first!

The roster & rotation a regularly updated each week with community ideas taken into consideration. We're even accepting NEW and ORIGINAL maps.

CRAZY EVENTS

Worried about being too competitive? We have several CRAZY EVENTS just for fun!

These include Golden Apple events (where every player spawns with a stack of golden apples) quite frequently throughout the month.

In conclusion we don't want to make the mistakes of the past, we're looking to the future and a way to provide a sever that gives you the modern games you want! It's a server that gets regular updates, and we're always interacting with the community so- hey?
